Investigating interactions in a Human Robot Collaborative Task

We are looking for participants for a human-robot interaction study. This experiment will take approximately one hour and will be conducted at the Monash Robotics Lab (23 College Walk - Engineering 60 (60) - Ground Level - G25, Clayton Campus). During the experiment, you will be asked to **complete an assembly and disassembly** task with the assistance of the **KUKA** robot. You will be asked to exchange a series of objects with the robot related to crafting and to fill in a questionnaire while being video and audio recorded. Participation is voluntary. Please contact Finlay Callahan (fcal0003@student.monash.edu, 0415 176 119) if you have any questions or require further information. Full explanatory statement:
